# What is HB-101 ?

HB-101 is an all-purpose natural plant vitalizer – Made in Japan, OF&G organic certified product which is made of naturally extracted ingredients Japanese Cedar, Cypress, Pine and Plantain thus very safe for human, pets and environments.

HB-101 is “Easy to USE” and “Cost Effective” product, all you need to do is to dilute the concentrate by water or mix (or put) the granules in (on) the soil with low usage. HB-101 has gained the approval of many people who enjoy growing plants, farmers, farm business operators, kitchen gardeners, horticulturalists, and garden hobbyists including Bonsai enthusiast throughout Japan and more than 50 countries for more than 45 years.

## How to use HB-101 for Bonsai?

Bonsai daily care using HB-101 is quite simple as Sprinkling diluted (1:1000 to 1:10000 ratio) solution to soil and both side leaves once a week for all season. There are some more tip to use HB-101 for Bonsai hereafter “Customer’s voice” especially special occasion such as repotting, reforming... etc...

## Nearly dead "SATSUKI" recovery

Nearly dead "SATSUKI" which damaged all around including root. Then strip the leaves.

- Strip the Bark partly.
- Brush diluted HB-101 (300 times dilution) solution over the stripped part.
- Pour same solution into the damaged hole and soil.

- Tiny sprout appears on next year.
- Recovered amazingly 3 years later as shown.

Nearly dead “GOYOU-MATSU”. Applied HB-101 weekly for 6 month, now changed interval to every 10 days. Therefore the “GOYOU-MATSU” recovered lively and it has been prized at local competition as picture shown.

Nearly 80 years old “Sakura” bonsai. It was neither sprout nor bloom due to the recent severe cold climate in winter. Applying HB-101 helped to recover from climate damage, therefore sprouting and blooming in next spring as shown.

I have been using HB-101 for 15 years so far. The HB-101 is essential item for me to take care of my "Satsuki" bonsai collection. Sprinkling diluted (1000 times) HB-101 to bonsai which is easy and efficient. Please kindly see my "SATSUKI" collection.

盆栽

I have been using HB-101 for more than 10 years for daily care of my bonsai.

It is also nice to use HB-101 in the event of Bonsai transplanting, soaking the root in the 1000 times diluted solution over night which helps its condition of the transition.

Especially HB-101 encourages sprouting, blooming and reducing the pesticide usage. That is why I have been mixing HB-101 and pesticides when applying the pesticides to the Bonsai.

Also mixing the granule HB-101 with fertilizer helps leaves condition healthy.

## SINJI SATSUKI Bonsai Club

All our "SATUSKI" Bonsai member (32 people) have been using HB-101 for their bonsai care.

HB-101 helps the bonsai condition for all season, also minimize the pesticide usage. Applying 1000 times diluted solution by sprinkling, affusion or watering with very low pesticide use.

Applying HB-101 to the leaves and root in the event of reforming Bonsai in winter which helps the bonsai shape going to be nicely and sprouting lively in spring.

Please find our competition pictures.
